

I strongly urge you to resist corporate pressure for further loosening of FCC regulations. I have read extensively on the issue and see that far more harm than good can come from it. Narrowing the TV and radio opinion is a risk to free speech and I believe it will seriously harm our democratic government. I have already been speaking to my elected representatives and they are prepared to defend our free speech by holding up the existing regulations. Please use your wisdom and recognize that this is not a move that enhances democracy but diminishes one of our highest held values -- free speech. Thank you.
